

Configuration for itech.pythonanywhere.com

Reload:

[Reload itech.pythonanywhere.com](#)

Best before date:

Free sites have a limited lifespan, but you can renew that here up to a maximum of three months from today's date. You can always extend it later too! We'll send you an email a week before it expires. [See here for more details](#).

This site will be disabled on **Tuesday 28 February 2017**

[Run until 3 months from today](#)

[Paying users'](#) sites do not have expiry dates.

Traffic:

How busy is your site?

This month (previous month)	26	(50)
Today (yesterday)	26	(50)
Hour (previous hour)	26	(0)

Want some more data? [Paying accounts](#) get pretty charts ;-)

Code:

What your site is running.

[/home/itech/rango_registration](#)
[Go to directory](#)

Source code:

[/home/itech/](#)
[Go to directory](#)

Working directory:

[/var/www/itech_pythonanywhere_com_wsgi.py](#)

WSGI configuration file:

2.7

Python version:

Virtualenv:

Use a virtualenv to get different versions of flask, django etc from our default system ones. [More info here](#). You need to **Reload your web app** to activate it; NB - will do nothing if the virtualenv does not exist.

[/home/itech/.virtualenvs/itechapp](#)

[Start a console in this virtualenv](#)

Log files:

The first place to look if something goes wrong.

[itech.pythonanywhere.com.access.log](#)

Access log:

[itech.pythonanywhere.com.error.log](#)

Error log:

[itech.pythonanywhere.com.server.log](#)

Server log:

Static files:

Files that aren't dynamically generated by your code, like CSS, JavaScript or uploaded files, can be served much faster straight off the disk if you specify them here. You need to **Reload your web app** to activate any changes you make to the mappings below.

URL	Directory	Delete
/static/admin/	/home/itech/.virtualenvs/itechapp/lib/python2.7/site-packages/django/contrib/admin/static/admin	
/static/	/home/itech/rango_registration/rango_reg/static	
Enter URL	Enter path	

Password protection:

Ideal for sites that are under development when you don't want anyone to see them yet. You need to **Reload your web app** to activate any changes made here.

Password protection:

☐ Disabled

Username:

[Enter a username](#)

Password:

[Enter a password](#)

Delete:

Deleting this web app will remove your web app from the Internet, but will not remove your code. The WSGI configuration file will be backed up.
